Keep eyes open and rinse immediately and repeatedly with water for at least 15 minutes.

5. FIRE FIGHTING MEASURES

Flash point:
See heading 9

Extinguishing media :

- suitable:
Foam, carbon dioxide (CO₂), powder.
- not recommended:
do not use water jets (stick jets) for extinguishing fire since they could help to spread the flames.

Specific hazards :

Incomplete combustion and thermolysis produce gases of varying toxicity such as CO, CO₂, various hydrocarbons, aldehydes and soot. These may be highly dangerous if inhaled.

Protective measures for firefighters :

Insulated breathing apparatus must be worn in confined premises with heavy concentrations of fumes and gases.

6. ACCIDENTAL RELEASE MEASURES

See sections 8 and 13.

After spillage / leakage :

- On the soil:
Surfaces on which the product has been spilled may become slippery.
Do not allow the product to enter sewers or rivers or contaminate the soil.
Recover with mechanical means such as pumps and skimmers.
Contain and collect the spilled product with sand or any other inert absorbant material.
In case of spillage, contact the competent authorities if the situation cannot be brought under control rapidly and efficiently.
- On water:
Floating absorbant material, then mechanical recovery.
If the product is spilled in a river or in the sewers, notify the authorities of the possible presence of floating items.

7. HANDLING AND STORAGE

HANDLING :

Prevention of user exposure :

Ventilate extensively if the formation of vapours, fumes, mists or aerosol is a risk.
Make all the necessary arrangements in order to reduce exposure risk, notably to products in use or to wastes.
Keep away from combustible substances; keep away from food and beverages.

Prevention of fire and explosion :

Empty containers may contain flammable or explosive vapours.
There is a fire hazard associated with rags, paper or any other material used to remove spills which become soaked with product.
Avoid accumulate of these: they are to be disposed off safely after use.

Precautions :

Avoid static electricity build up with connection to earth.
Set up machinery and equipment so as to avoid the risk of accidental spills or splashes onto hot machine parts and electrical contacts (on joint failure, for example).

Technical measures :	Make the necessary arrangements to prevent water and soil pollution.
Storage precautions :	- Suitable: Store at room temperature, protected against contact with water and moisture, and away from any source of ignition. Keep containers closed when not in use - To be avoided: Do not store exposed to the elements.
Incompatible products :	Dangerous reaction with strong oxidizing agents.
Packaging materials :	- Recommended: Use only hydrocarbon-resistant containers, joints, pipes, etc. Keep in original container if possible. Otherwise, transfer all indications on the regulatory label to the new container.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Technical measures :	Use the product in a properly ventilated atmosphere. When working on enclosed place (tanks, reservoirs...), make sure that atmosphere is not suffocating and/or wear recommended equipment.
Occupational exposure limit :	. oil mist : 10mg/m ³ , for 15 minutes . oil mist : 5mg/m ³ , for 8 hours
Hand protection :	The demands on the gloves are determined by the condition in practice (f.e. multiple use, mechanical load, temperature, strength and duration of exposition). Before choosing suitable gloves, it is recommended for the user to test the gloves. The breaking-through times of the same type of glove of different manufacturers can be very different - even if the layer thickness is similar. Therefore the breaking-through times have to be found out by the manufacturer of the protection gloves himself. Impermeable hydrocarbon-proof gloves. recommended material: nitrile , neoprene.
Eye protection :	Goggles, in case of risk of splashing.
Skin and body (other than the hands) protection :	As required, wear a face mask, hydrocarbon-proof clothing, and safety boots (when handling drums). Don't wear ring, watch or similar thing which will be able to hold the product and may give rise to some skin diseases.
Hygienic work practices :	Avoid prolonged and repeated contact with the skin, especially with used or waste product Immediately remove all soiled or stained clothing. If the product comes into contact with the skin, wash the affected area immediately and copiously with soap and water. Use no abrasives, solvents or fuels.
