### 5. Fire-fighting measures

- Flash point: See heading 9
- Fire extinguishers:
- suitable : Foam, carbon dioxide (CO<sub>2</sub>), powder
- not suitable : do not use water jets (stick jets) for extinguishing fire since they could help to spread the flames.
- Specific hazards: Incomplete combustion and thermolysis produce toxic gases such as CO, CO<sub>2</sub>, various hydrocarbons, aldehydes and soot. These are highly dangerous if inhaled
- Firefighter protection: An insulated breathing apparatus must be worn in confined premises with heavy concentrations of fumes and gases
- 

### 6. Accidental release measures

- See also heading 8 and 13:
- After spillage / leakage:
- on soil: Surfaces on which the product has been spilled may become slippery  
Avoid discharge of the material in a stream or a sewer or cause ground contamination.  
recovery by physical means  
Contain and collect the spilled product with sand or any other inert material.  
In the event of a major spill, inform the competent authorities if the situation cannot be brought under control rapidly and efficiently
- on water: Use floating absorbent material to be removed mechanically  
If the material has been discharged into a stream or a sewer, inform the authorities of the possible presence of floating materials
- 

### 7. Handling and storage

- HANDLING:
- Technical measures :
- . prevention of user exposure: Provide adequate ventilation in case of the potential formation of vapour, fumes, mist or spray  
Take all measures to reduce the risk of exposure, in particular to used or waste product  
Keep away from flammable material; keep away from food and beverages
- . Prevention of fire and explosion: Empty containers may contain flammable or explosive vapours  
There is a fire hazard associated with rags, paper or any other material used to remove spills which become soaked with product  
Avoid accumulate of these: they are to be disposed off safely after use
- Precautions : Avoid static electricity build up with connection to earth.  
Set up machinery and equipment so as to avoid the risk of accidental spills or splashes onto hot machine parts and electrical contacts (on joint failure, for example)
- Safe handling advice : Avoid contact with strong oxidizing agents  
Use only hydrocarbon-resistant containers, joints, pipes etc...
